## **LOGIN PAGE**

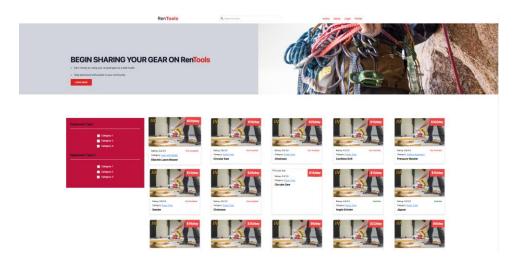

To access the contents of the Tool Rental Website, you need to log in using your user ID and password. When you first navigate to the Website, a login screen will appear, prompting you to enter your credentials. Once you have entered your login information, you will be directed to the homepage of the portal, where you can access the system's features and functions.

If you attempt to book a rental without being logged in, you will be automatically redirected to the login page. To log in, simply enter your user ID and password in the appropriate fields, and then click the "Sign in" button to proceed. If you do not yet have an account, you will need to register for one before you can log in and use the system.

### **MENU PAGE**

#### **Menu Page**

The Menu page displays a list of available tools that you can rent for your projects. Each tool is represented as a card that contains information about the tool, such as its name, image, category, rental price, rating, and availability status.

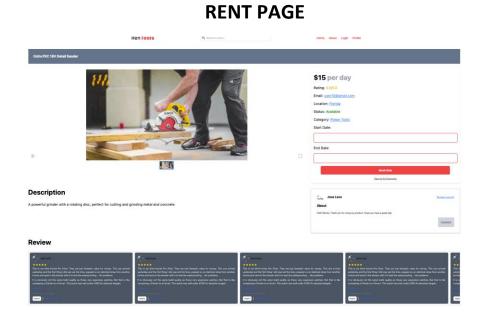

To view more details about a tool and book it for rental, simply click on the card of the tool you are interested in. You will be directed to the Item page where you can see more information about the tool and proceed to book it for rental.

### How to Use the Menu Page

- 1. Navigate to the Menu page by clicking on the "Menu" link in the navigation bar or by entering the URL for the page in your browser.
- 2. Scroll through the list of available tools to find the one you want to rent. You can view the tool's image, name, category, rental price, rating, and availability status.
- 3. Click on the card of the tool you want to rent. You will be directed to the Item page where you can view more details about the tool and proceed to book it for rental.
- 4. If you are not logged in, you will be directed to the Login page where you need to enter your login credentials to access the system. Once you are logged in, you can return to the Menu page and proceed with the rental process.
- 5. If the tool is not available for rental, the availability status on the card will be "Not Available" and the "Rent" button will be disabled.

#### **Important Notes**

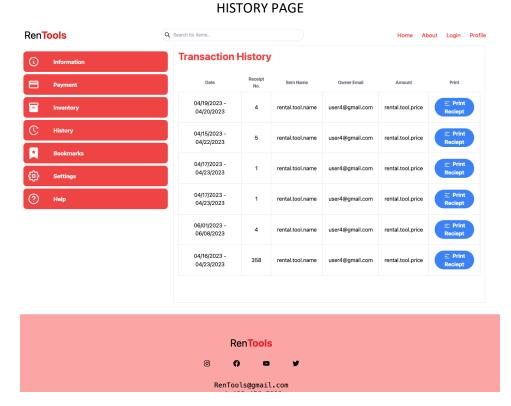

- The tools displayed on the Menu page are fetched from the server using a REST API. If the server is down or not responding, the page may not display any tools.
- The rental price and availability status of the tools are subject to change depending on the system's configuration and the availability of the tools in the inventory.
- To access the Menu page and the rest of the system's features, you need to be logged in using your user ID and password. If you are not yet registered, you need to sign up for an account before you can log in and use the system.

This page displays information about a particular tool, including its name, rental price, rating, availability status, category, owner's email, and location. Users can view images of the tool by using the slider provided. Users can also select a start and end date using the date picker to check the availability of the tool.

To rent the tool, users can click the "Book Now" button. They will be prompted to log in if they have not done so already. Once logged in, users must select a start and end date using the date picker, and then click the "Book Now" button again to confirm the rental. If the rental is successful, a confirmation popup will appear.

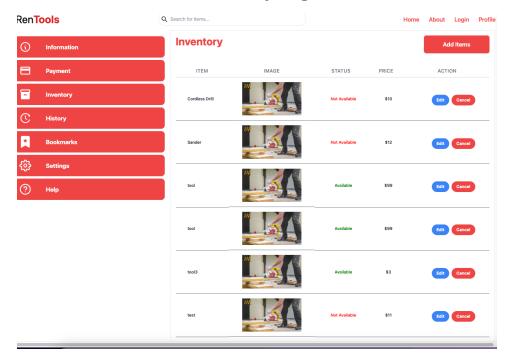

# **PROFILE PAGE**

Transaction History allows you to view a list of all the tools you have rented in the past. The list shows the date you rented the tool, the receipt number, the name of the tool, the email of the owner of the tool, and the amount you paid for the rental.

You can also print a receipt for any of the tools you have rented by clicking the "Print Receipt" button next to the rental you are interested in.

# **Inventory Page:**

Inventory page allows the user to view a list of items and their availability status. The system provides a table with columns for item name, image, status, price, and an action column where the user can edit or cancel an item.

The user can also add new items to the inventory by clicking the "Add Items" button, which will open a form where they can enter the details of the new item.

The system retrieves the list of items from a server and displays them in the table. It also updates the list whenever the user adds a new item.

# **Add Item**

### Instructions

Let's get ready to showcase your rental. In order for you to get as many rentals a possible, all listings are required to have a few things in order to ensure the best experience for potential renters.

- 1. Please ensure that you have at least 3 photos (minimum required amount) but 7 is optimal of your item.
- 2. Your equipment should be cleaned, properly maintained and in prime condition prior to renting out and taking your photos.
- 3. For the photos, the higher quality image, the more rentals you will get.
- 4. Please take your photos with a bright background and so you can see the contrast of your item.
- Take your photos with a landscape/horizontal format rather than vertical.
  Photos of your listing page and search results are display in landscape format.

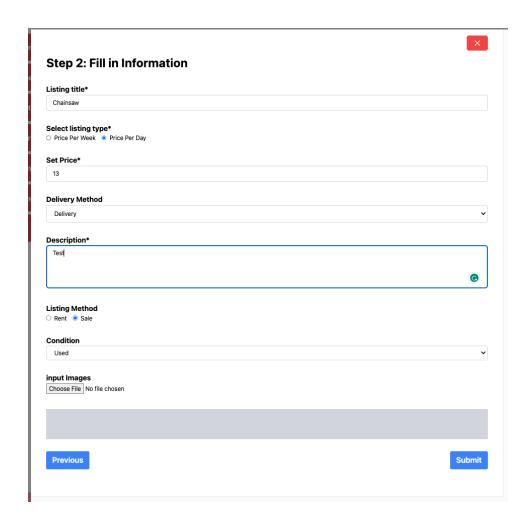

For more tips of taking high quality images, please read this. After you have listed your item, a member from FriendWithA will review your item before it goes live.

# **Step 1: Select Tool Category & Location**

This page part of a web form that allows users to create a listing for a tool. The functionality is divided into two steps, with each step displaying different content.

In the first step, the user selects the category of tool they want to list and their location. They can choose from several categories, including Power Tools, Hand Tools, Electronics & Photography, Art & Crafts, and Others. After making their selection, they can move on to the next step by clicking the "Next" button, or go back to the previous step by clicking "Previous."

In the second step, the user fills in the information about the tool they want to list. They enter the name of the tool, select a listing type (either "Price Per Week" or "Price Per Day"), set a price for the tool, select a delivery method (either "Pickup" or "Delivery"), write a description of the tool, and select a listing method (either "Rent" or "Sale"). Once they have filled in all the required fields, they can submit the form.
